

Cam Studio

3 in 1 videoconference camera with speakers and mic

DESCRIPTION

Premium USB video bar built for hybrid learning and working, delivering the best audio quality in its class. It blocks distracting sounds that can interrupt meetings, so classmates or teams on both ends of the call catch every word. With group framing and automatic speaker framing, the connection feels personal. They see all the important details, including body language and facial expressions. Plug in the USB cable to the PC for both video and sound calls or simply connect via Bluetooth for sound only calls.
