

1702U USB Camera

Upgrade meetings and classes with professional assets

DESCRIPTION

1702U USB Camera delivers 4K video with a 110° ultra-wide lens, capturing classrooms and meeting rooms with clear, natural detail. Plug-and-play USB 3.0 connectivity combines power, video, and audio in one cable, while the built-in microphone array ensures clear voice pickup up to 6 meters. Advanced AI enables automatic framing and smooth human tracking, eliminating manual adjustments, and convenient remote control allows quick access to presets and key functions for a professional, effortless experience.
